Automated Program Repair

Project: Statement of Originality

We hereby declare that the source code we submitted for the project task of the *Program Repair* course (Winter 2025/26) was implemented by us and represents our own original work. While we may have consulted existing automated program repair (APR) tools and techniques (e.g., GenProg), read academic papers or other relevant materials to understand the underlying ideas and concepts, we certify that the source code we submitted is not copied, completely or partially, from any existing APR tool.

We certify that **we have not engaged in** any of the following activities:

- Copying code, completely or partially, from existing APR tools (e.g., GenProg).
- Copying code, completely or partially, from past students' submissions.

We understand that the following activities are **permitted**:

- Reading academic papers, source code (e.g., replication packages or GitHub repositories), or other materials related to APR.
- Implementing algorithms described at a high level in papers, lectures, or books.
- Using standard libraries and frameworks (e.g., testing frameworks and AST libraries) supported by the language ecosystem.

We acknowledge that any violation of this declaration may result in failure of the project task or other penalties in accordance with university regulations. By signing below, we confirm that, to the best of our knowledge, the statements made in this document are true about our project implementation.
